RRC SUMMER INTERNS

This summer we had 2 French students join us for 2 months, working towards developing 2 applications to enhance monitoring and recording for river restoration projects. Thomas worked to develop a Fixed Point Photography (FPP)

App, whilst Manon built on the [River Habitat Survey \(RHS\) App](#), transferring this from Android to iOS. Thanks for all your hard work! We wish you all the best for your studies.

RRC TEAM IS GROWING!

We are pleased to introduce our newly appointed **Science and Technical Officer** Hannah Joyce who is soon to complete her PhD in river channel planforms at Durham University. Hannah will be working on the Measuring Impact of Citizen Science (MICS) project funded by the EU Horizon 2020 research programme. This project aims to determine measures for assessing the impact of citizen science on society and the environment.
