INTRODUCTION TO HYDROMORPHOLOGY (LEVEL 1) ONLINE TRAINING COURSE - 15TH JULY

Earlier this month RRC held our first online training course, incorporating a virtual site visit! The 'Introduction to Hydromorphology (Level 1)' online course received lots of positive feedback, and participants learnt about online resources such as Google Earth Online, to look at features and identify modifications in the field. [Read the blog from the training](#) to find out more.

We have now secured a date for the next 'Introduction to Hydromorphology' online course - **15th July**. Spaces are filling up fast, so make sure you secure your place soon!

Unable to make this date? [Email us and register interest](#) in attending an online course.

RESEARCH STUDY ON FLOOD RISK MANAGEMENT

Have you been involved with Flood Risk Management work?

Take part in a research study on 'How should we involve local residents in FRM?', at Imperial College London. The survey will take 10-15 minutes and is completed online.
