## What's going on in Scotland?

Numerous river restoration focused projects have been completed or are underway in Scotland courtesy of the Scottish Government's Biodiversity Challenge Fund (BCF), a competitive fund administered by NatureScot. Launched in 2019, it's aimed at innovative action that will help mitigate the effects of climate change and improve biodiversity by increasing the resilience of our most at-risk habitats and species and creating large areas of new or restored habitat. The investment supports Scotland's post-pandemic green recovery.

### 2020 UK River Prize - Reach-scale award Winners - Allt Lorgy, Scottish Highlands

This is a typical upland spate burn that, in the late 1980s, was significantly managed for agricultural purposes. The project is based on restoring the morphology and associated habitats of a 1km section of river and its adjoining floodplain. It has re-established the fundamental physical processes that drive the evolution of the river's form and the associated benefits for ecology.
