Launch of 'Engineering with Nature an Atlas – Version 2'

Partnership of Environment Agency, United States Army Corps of Engineers (USACE), Rijkswaterstaat and NGOs have developed two international guides on Natural Flood Management. 'Engineering with Nature an Atlas – Version 2' will be virtually launched on 7th April at 16:00 UK time. [Book your place at the launch!](#) Plus, look out for 'Natural and Nature Based Features (NNBF) Guidelines' coming in Spring/Summer 2021.

Liver fluke & Stage 0 restoration

National Trust are currently exploring the likelihood of the impact of Stage 0 restoration on liver fluke. It is likely that the increase in wetted area could increase the presence of the liver fluke on site. Do you have experience with managing grazing around liver fluke or any information around Stage 0 projects which could help? Please contact BureRiverlands@nationaltrust.org.uk with any information.
