Upcoming RRC Site Visits

RRC has a long history of running friendly and informative site visits to really good examples of restoration best practice and innovation. Site visits are free to members (£10 deposit to be refunded following attendance at site visit). If space is available non-members are also welcome to attend at a small cost (usually approx. £30). We currently have 4 upcoming visits. Check them out and book your place! Don't miss this chance to see real world river restoration examples.

James White leaves RRC

After just over 2 years with RRC, James is leaving and moving onto the University of Birmingham where he will be a Research Associate. James' new role will involve conducting water science research, focusing on guiding ecologically effective river management decisions. We wish James the best of luck for the future.

We would like to thank

and our core funders for their continued support
