## NEW DESIGNATED RIVERS INFORMATION HUB

In partnership with Natural England & the Environment Agency, the RRC has become the host for a web-based hub for information relating to the restoration of designated rivers in England. The hub contains a map which links to a summary of relevant information for 15 of the designated rivers, including all relevant publically available documents & strategies. More designated river summaries will be added in the coming months >>

### ANALYSIS OF UK RIVER RESTORATION & RHS DATA

Using RRC's UK inventory data and the EA River Habitat Survey database, this paper, co-authored by Jenny Mant (RRC), shows the value of utilising datasets to support the science & practice of restoration. It highlights links between restoration techniques & catchment attributes >>

## REFORM

### REVIEW OF RESTORATION EFFECTS, COSTS & BENEFITS

A series of reviews published by **REFORM** are shaping the research agenda for restoration & catchment management. The project reported on topics including hydro-morphological & ecological effects after restoration; estimates of cost-benefit; and ecosystem services >>
