

RRC WORKSHOPS

Thank you to those who attended and helped organise our Ecosystem Services Course earlier this month. You can read all about it in our RRC Blog >>

NEW BOOKS

Jeremy Purseglove has completely updated his 1986 classic *Taming The Flood*. From his experience in the water and engineering industries, Purseglove reveals how harnessing nature, rather than attempting to repress it, is the only solution. *Taming The Flood* is available now for £25 >>

NEXT COURSE...

Developing strategic monitoring schemes - the what, when and how.

Link objectives to effective monitoring

Think about how to use monitoring for success evaluation

Design a monitoring scheme

[Book here >>](#)

River Habitats For Coarse Fish by Dr Mark Everard outlines how fish species depend on the variability of river habitats throughout their lives. It provides the reader with knowledge and practical guidance on improving habitats for fish. Pre-order here for £11.95 >>

EU ECOSYSTEM SERVICES AND BIODIVERSITY REPORT

The latest issue of the European Commission's Science for Environment Policy report has been released. This 31 page in-depth report looks at ecosystem services and biodiversity. The report looks at the basic concept, latest research into ecosystem services, mapping techniques and ways of quantifying benefits. The overall theme that runs throughout the report is that ecosystem services need to be considered as part of a wider system >>

400 NEW PROJECTS ADDED TO UK MAP

Just over 400 projects have been added to the RRC's UK Projects Map, these have been uploaded from the RiverWiki and the NRRI database. To update and maintain the integrity of these resources we require the help of organisations and trusts to send us information on their projects. **Please keep adding your projects to the RiverWiki, if you require any help with doing this please contact us.**
