

OUTPUTS FROM RRC ANNUAL CONFERENCE NOW ONLINE

The RRC website has now been updated with the slide presentations from the event. Where presenters have supplied notes to accompany their slides this information has been included in the Sessions Materials link.

Electronic versions of the posters that featured at the conference in addition to the delegate handbook are also online. The website will continue to be updated as and when we receive further information from presenters at the event.

RRC MEMBERS SITE VISITS 2011 - MORE TBA SOON

For the last couple of years the RRC has run a number of site visits to river restoration projects across the UK that are free for members to attend. There is a limit to the numbers for each session and places will be allocated on a first come first served basis.

It is anticipated that two more will be announced shortly — the recently restored Beam Washlands and the Woodsmill Stream project. More details will be sent out in the next few weeks.

RESTORE PROJECT - COMPETITION WINNER

The River Restoration Centre is the West Region lead organisation for the [EU LIFE+ RESTORE Information and Communication project](#) (2010-2013) which encourages the communication of sustainable river restoration best practice across Europe.

Dr Werner Lazowski (Austria) was the winner of our recent competition to win a year's free individual membership with the RRC as part of the EU LIFE+ RESTORE project. Contacts were asked about river restoration activities, networks and project and seminar themes in their country and were asked about what they would like to see achieved through the RESTORE project. We would like to thank everyone who took the time to fill in the short questionnaire, and we welcome any further responses. [Please send to the RRC](#)

MEET THE RRC STAFF: NICK ELBOURNE

Over the next few months, each Bulletin will feature a member of RRC staff to give you a better idea about what the RRC does day-to-day through its staff. First up is the RRC's Information Officer, Nick Elbourne.

"I manage and update the National River Restoration Inventory (of projects), a large resource of river restoration project data in the UK and I administer the RRC website and social media. I also support project staff in writing and editing advisory reports and lately I have been starting to profile the makeup of "River Restoration networks" in Western Europe as part of the EU LIFE+ project RESTORE. I would like to hear from anyone who has project updates or info about river restoration in Europe (be it projects or contacts!) and any news and events items that you would like us to share. Please get in touch with me directly if you would like to know more! nick@therrc.co.uk
