### Designated river projects

View all projects proposed or completed, and case studies through the RRC's UK projects map [here](#).

### Next steps

River Axe Catchment Partnership will have a major role in progressing the planned actions. The partnership will do this by supporting partners in working on all actions set out in the plan. Some actions can provide immediate benefits, for example, ensuring compliance with existing Regulatory frameworks. Other actions will require long lead in times for planning, delivery and for outcomes to be realised.

**The national programme of river restoration planning & implementation on river SSSIs in England is led by:**

with information & resources hosted by

Available documentation is dependent upon the current status, and approach planned for each river.
