

RIVER RESTORATION PROJECT DELIVERY TRAINING COURSE

How to assess, plan and deliver projects

Wednesday 21 September 2016, 9:30 am - 5 pm, Cookstown, Northern Ireland

This one-day course will provide training in how to assess, plan and deliver river restoration projects, through a mixture of discussion, practical exercises and site visits. There will also be opportunity to discuss your own projects or ideas, and any associated technical questions.

Content includes:

- Identifying issues and appropriate restoration solutions on-site
- Restoration project planning
- Introduction to monitoring techniques for evaluation: Trout habitat sampling, Riverfly invertebrate identification and fixed point photography
- Site visits with Ballinderry Rivers Trust to Tulnacross silt remediation works and Lissan Water trout nursery habitat, to discuss lessons and successes

For trusts, community groups and volunteers
