

Saturday 16 March,
10:30 – 3:30pm
Pangbourne Village Hall,
Pangbourne, RG8 7AN
Free cake and tea/coffee

FLOODING FLOODING

IN THE PANG VALLEY: PAST, PRESENT AND FUTURE

This free event is open to all. Come and find out about the steps that have been taken since the previous floods; learn about the new projects which aim to reduce future flooding risk, and find out what you can do on a personal level.

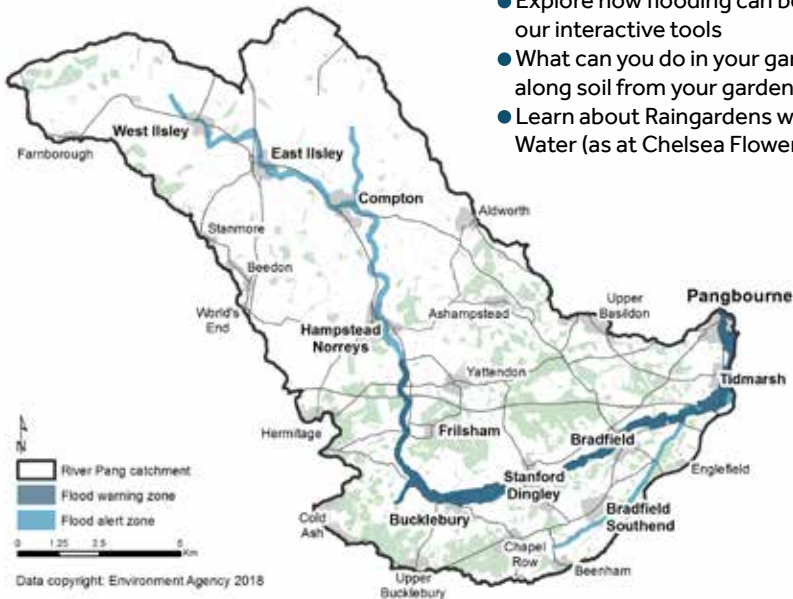

WHAT TO BRING?

- Yourself, your knowledge and ideas
- Your photos of local flood history (optional)
- A handful of air-dried soil from your garden in a bag or container (optional).

PHOTOS: WHAT CAN YOU BRING?

Bring any photos or images you have which document local flood history in the Pang Valley. Photos can be in any format you have, such as newspaper clippings, digital or printed photos.

Map of Pang Valley with river and key locations

SOIL: WHAT DO YOU NEED TO DO?

- Collect a handful of soil from your garden
- Put the soil into an open container or unsealed bag and leave it to dry out in the air for 3 – 4 days. If possible, leave the soil above the heating or in a sunny place to speed up the air-drying process
- Bring the air-dried soil to the event in a bag or container for testing.

WHAT'S ON

- Share your knowledge of local flood history
- See what has been done to reduce the risk of flooding since 2007
- Find out about Natural Flood Management and share your ideas
- Explore how flooding can be managed using our interactive tools
- What can you do in your garden? Bring along soil from your garden for testing!
- Learn about Raingardens with Thames Water (as at Chelsea Flower Show).
