River Habitat Survey Certification course Refresher

18th October 2019, Warrington, 09:30 – 16:00

£155 +VAT

This course is a one-day refresher to update the certification previously gained. The RHS certification lasts 3 years, and this update will provide surveyors with another 3 years of certification.

If you are an RHS surveyor, and your certification is soon to expire, then this course is for you.

The course aims to cover any queries highlighted by current surveyors, and a Q&A session will encourage discussion around any issues. There will be a session on application of RHS, providing a chance for participants to showcase how they have used RHS in the workplace to benefit their projects and schemes. We encourage anyone interested to please bring along reports or applications to illustrate their work if they wish. There will be a fieldwork session at a nearby site in the afternoon, followed by the Q&A at the end of the day.

Please note, although the certification uses the same material and adopts the same standards as the Environment Agency (EA) accreditation scheme, the EA does not endorse external organisations or schemes and therefore this RHS certification is not valid for carrying out surveys for the EA.

Training course discount

We are holding a Hydromorphology for River Restoration (Level 2) course on Thursday 17th October, the day before the refresher course at the same venue in Warrington. If you wish to attend both courses we offer a discount. The total cost for both courses would be £360 for members and £430 for non-members (including VAT).

Please email us rrc@therrc.co.uk if you would like to attend.
